

RAILWAY LOGISTICS

Your Trusted Expert in Railway
Solutions.

Who Are We?

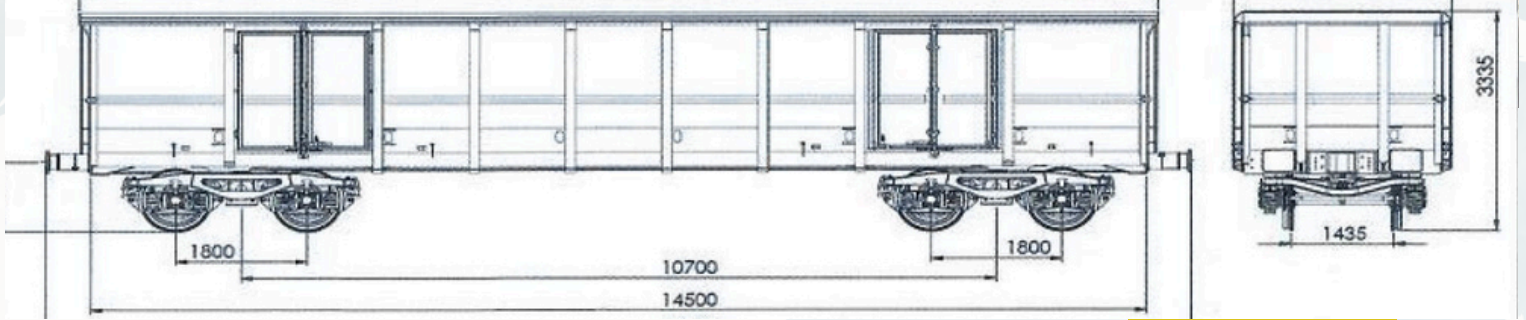

WE ARE STRONG IN RAILWAY!

As İÇDAŞ Railway Logistics, we carry out railway freight transportation with our 176 Eanoss type, UIC standard self-owned wagons and contribute to the reduction of carbon footprint. By using the entire railway network effectively, we offer reliable, environmentally friendly and sustainable logistics solutions.

WE CARRY TO THE FUTURE!

İÇDAŞ Railway Logistics minimizes carbon emissions by adopting green logistics principles and acts with an environmentally friendly transportation approach.

WAGON TECHNICAL SPECIFICATIONS

Tare: 25.8 tons

Tonnage: 64.2 tons

Capacity: 82 m³

Floor Area: 39.4 m²

Side Doors: 4×(1800×1800 mm)

Chassis Length: 14,500 mm

Chassis Width: 3,060 mm

Wagon Height: 3,335 mm

Bumper to Bumper Length: 15,740 mm

Distance Between Two Axles in a Bogie: 1,800 mm

Pivot Centers: 10,700 mm

Loading-Unloading: Open-top wagon

Number of Axles: 4

Wheel Set: Monoblock

Buatagres: Bearing

Traction Draw Hook: UIC 540 Type

Buffer: Ring Spring 32 kJ

Automatic Coupling: Yes

Air Brake: MH-GP-A

Brake Shoes Type: Composite

Base Material: Sheet Metal Steel

Maximum Speed: 120 km/h

WHY RAILWAY?

- Competitive freight advantages
- Higher transportation capacity
- Fixed and shorter transit times
- Safer than road transportation
- Environmentally friendly
- Reduces road traffic
- Fixed long-term pricing
- Flexibility in international logistics
- Not affected by weather conditions
- Ideal for heavy-tonnage loads
- Low risk, high efficiency

SUITABLE FOR EVERY TYPE OF LOAD!

- General cargo
- Palletized goods
- Bulk products
- 20', 40' and 45' containers

We are here to transport your load in an environmentally friendly, safe and timely manner!

With our Eanoss type wagons manufactured in accordance with UIC Standards, integrated transportation is possible not only domestically but also in Europe and the entire international railway network. 🌍

WHAT WE DO?

BAR LOADING

Long-form bars are safely loaded with special stacking techniques.

SCRAP MATERIALS LOADING

Scrap materials transportation carried out with environmentally friendly methods in accordance with standards.

EANOSS WAGON

Transportation in European and international networks with our UIC standard Eanoss wagons.

WIRE ROD LOADING

Spiral wire rods are fixed tightly and balanced against slipping and dispersion.

CONTAINER LOADING

Fast and effective transportation solutions for 20, 40 and 45 containers.

PROJECT-BASED LOADING

Safe solutions for loadings requiring special dimensions and equipment.

WHY US?

- Strong Logistics Infrastructure
- High Capacity, Fast Operation
- Intermodal Transportation Advantage
- Strategic Location
- Followable and Planned Processes
- Customer-Focused Service

SERVICE QUALITY

- Fast Delivery
- Regular Delivery
- International Delivery
- Safe Loading
- Customer-Focused Approach
- Environmentally Friendly Transportation
