

ECM Policy

- To carry out the maintenance of freight wagons in compliance with the requirements of 2019/779/EU and international standards, thanks to employees who are experts and possess high-level competence in their fields,
- To ensure the use of quality materials and the prompt intervention and resolution of problems by establishing mutual cooperation with our suppliers and subcontractors,
- To ensure that the wagons we maintain perform their commercial transport operations safely, without compromising on quality, and adhering to the principles of honesty and trust,
- To develop measures that, in addition to prioritizing safety in maintenance and repair activities, aim to provide an economically and environmentally friendly transportation service,
- To continuously follow technological developments and ensure the advancement of our personnel and infrastructure through necessary training and equipment,
- To contribute to making railway transportation a more preferred logistics system through the provision of maintenance services
- To continuously improve the level of quality by fulfilling the training and competence requirements of our personnel,
- To prioritize projects aimed at achieving ECM Safety Objectives,
- To continuously improve the effectiveness of ECM management system activities and processes.
