

Nuklear Applications and Mega Projects Policy

We attach the greatest possible importance to the quality, repeatability and traceability of all products related to nuclear power plant and mega projects. Therefore, we actively support a strong nuclear safety policy in all phases of the operating processes of our company.

Our leadership, behaviors and processes are built around the following underlying principles of nuclear safety:

- Safety = the first priority = a process of continuous improvement
- We anticipate the laws and regulations concerning nuclear safety and apply them scrupulously.
- We develop and promote a high level of safety culture.
- We set objectives and corresponding action plans to continuously improve product and process quality,
- We involve all our personnel in this process of continuous improvement and ensure that they actively participate in it. For this, İÇDAŞ spend necessary resources to achieve the required level of its employees' education, qualification and skills.

1

İÇDAŞ performs its activities in accordance with this Policy and it will continue to do so in the future. This Policy is used to develop strategies and plans of activities of İÇDAŞ in order to reach sustainable development.
